

## Journey Earth urn's

*The perfect choice for the scattering of ashes at sea.*

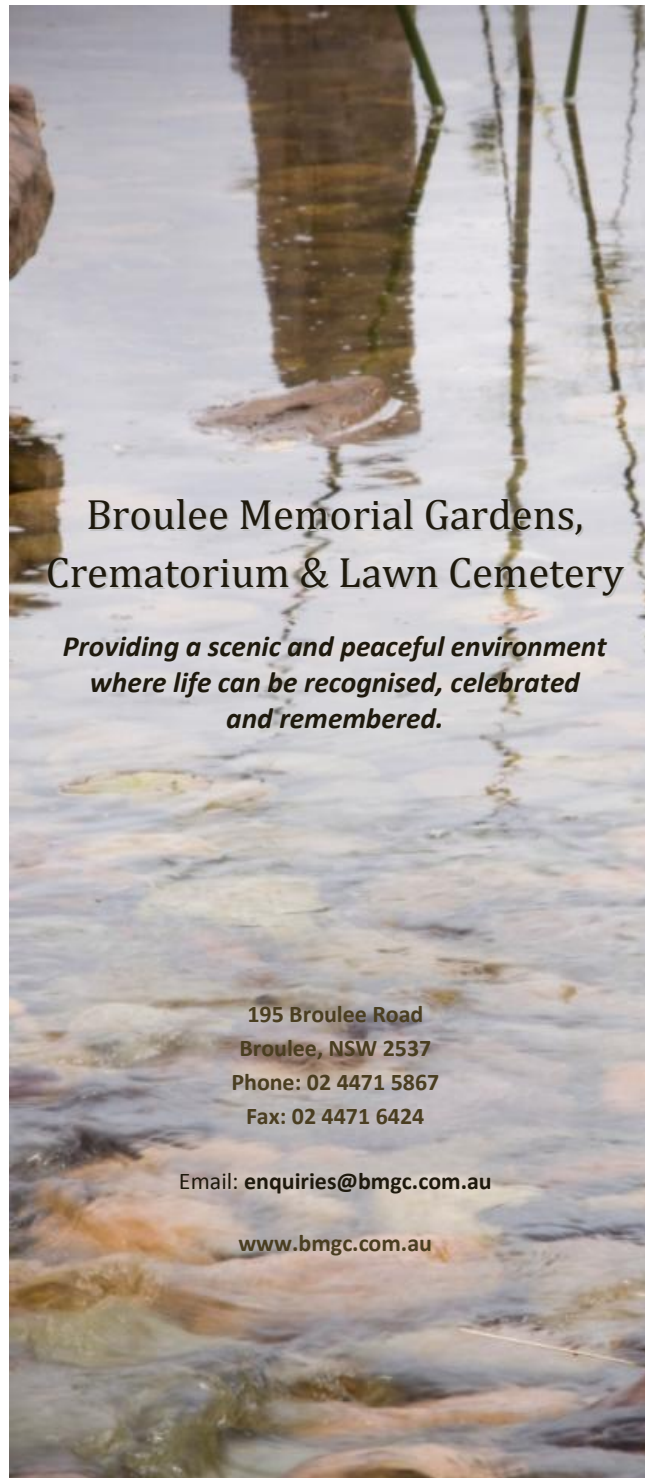

*These biodegradable urns are engineered to float momentarily and then gracefully sink. Once on the ocean floor, the urn will break down naturally over time. Available in a range of colours*

*The Shell as shown above is large enough to have ample room for personal notes, mementos or two sets of cremated remains*

*It is also possible to place a plaque within the gardens at Broulee Memorial Gardens even if the ashes have been scattered, thus giving family and friends a tangible place to visit and reflect.*
